Screenshot Evidence Report

Installment 2: Talking to the User — Expense Tracker

Name	John Vincent Y. Besinga	Yr & Section	DIT 3 – 7
Subject	Advance Programming (Python)	Date Prepared	October 5, 2026

GitHub Repository	https://github.com/JVBesinga/expense-tracker
--------------------------	---

Screenshot 1 — Navigate to the Project Folder

cd ~\python-course\expense-tracker, then pwd

```
PS C:\Users\3johnbrother's PC> cd ~\python-course\expense-tracker
PS C:\Users\3johnbrother's PC\python-course\expense-tracker> pwd

Path
----
C:\Users\3johnbrother's PC\python-course\expense-tracker

PS C:\Users\3johnbrother's PC\python-course\expense-tracker>
```

Figure 1. Navigate to the Project Folder

Screenshot 2 — Starting Point

git status — working tree clean before editing

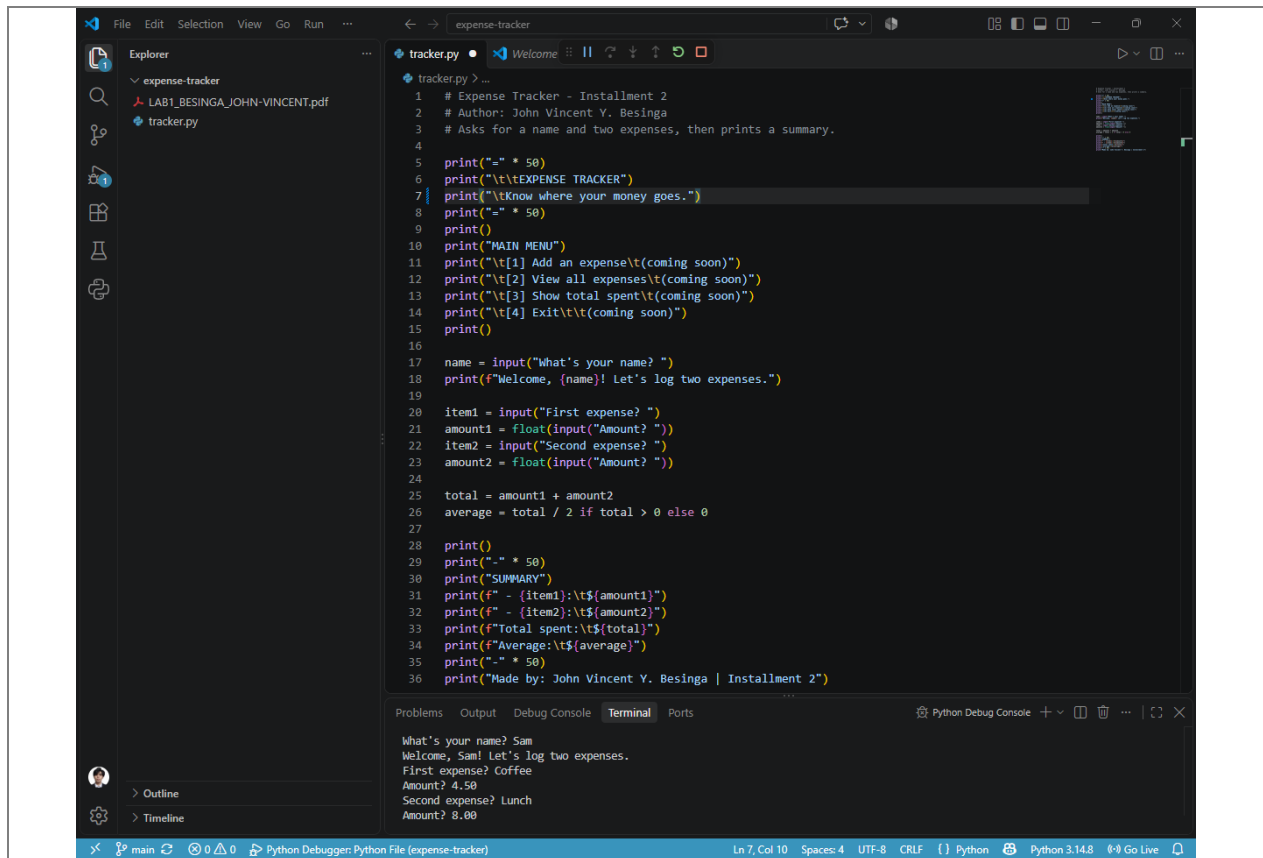

```
PS C:\Users\3johnbrother's PC\python-course\expense-tracker> git status
On branch main
Your branch is up to date with 'origin/main'.

nothing to commit, working tree clean
PS C:\Users\3johnbrother's PC\python-course\expense-tracker>
```

Figure 2. Starting Point

Screenshot 3 — Source Code

VS Code Explorer and complete `tracker.py`

The screenshot shows the Visual Studio Code interface with the `tracker.py` file open in the editor. The Explorer sidebar on the left shows the file structure of the `expense-tracker` project, including `LAB1_BESINGA_JOHN-VINCENT.pdf` and `tracker.py`. The editor displays the source code for `tracker.py`, which is a Python script for an expense tracker. The code includes comments, a main menu, input prompts for user name and expenses, calculations for total and average, and a summary output. The Terminal at the bottom shows the execution of the program with sample input and output.

```
1 # Expense Tracker - Installment 2
2 # Author: John Vincent Y. Besinga
3 # Asks for a name and two expenses, then prints a summary.
4
5 print("-" * 50)
6 print("\t\tEXPENSE TRACKER")
7 print("\t\tKnow where your money goes.")
8 print("-" * 50)
9 print()
10 print("MAIN MENU")
11 print("\t[1] Add an expense\t(coming soon)")
12 print("\t[2] View all expenses\t(coming soon)")
13 print("\t[3] Show total spent\t(coming soon)")
14 print("\t[4] Exit\t\t(coming soon)")
15 print()
16
17 name = input("What's your name? ")
18 print(f"Welcome, {name}! Let's log two expenses.")
19
20 item1 = input("First expense? ")
21 amount1 = float(input("Amount? "))
22 item2 = input("Second expense? ")
23 amount2 = float(input("Amount? "))
24
25 total = amount1 + amount2
26 average = total / 2 if total > 0 else 0
27
28 print()
29 print("-" * 50)
30 print("SUMMARY")
31 print(f" - {item1}: \t${amount1}")
32 print(f" - {item2}: \t${amount2}")
33 print(f"Total spent: \t${total}")
34 print(f"Average: \t${average}")
35 print("-" * 50)
36 print("Made by: John Vincent Y. Besinga | Installment 2")
```

Terminal Output:

```
What's your name? Sam
Welcome, Sam! Let's log two expenses.
First expense? Coffee
Amount? 4.50
Second expense? Lunch
Amount? 8.00
```

Figure 3. Source Code

Screenshot 4 — Program Output

python tracker.py with inputs Sam, Coffee 4.50, Lunch 8.00

```

PS C:\Users\3johnbrother's PC\python-course\expense-tracker> python tracker.py
=====
                EXPENSE TRACKER
            Know where your money goes.
=====

MAIN MENU
    [1] Add an expense      (coming soon)
    [2] View all expenses   (coming soon)
    [3] Show total spent    (coming soon)
    [4] Exit                (coming soon)

What's your name? Sam
Welcome, Sam! Let's log two expenses.
First expense? Coffee
Amount? 4.50
Second expense? Lunch
Amount? 8.00

-----
SUMMARY
- Coffee:      $4.5
- Lunch:       $8.0
Total spent:   $12.5
Average:       $6.25
-----
