Installment 3: The Tracker Does Math — Expense Tracker

Name	John Vincent Y. Besinga	Yr & Section	DIT 3 – 7
Subject	Advance Programming (Python)	Date Prepared	October 5, 2026

GitHub Repository	https://github.com/JVBesinga/expense-tracker
--------------------------	---

Screenshot 1 — Navigate to the Project Folder

cd ~\python-course\expense-tracker, then pwd

```
PS C:\Users\3johnbrother's PC> cd ~\python-course\expense-tracker
PS C:\Users\3johnbrother's PC\python-course\expense-tracker> pwd

Path
----
C:\Users\3johnbrother's PC\python-course\expense-tracker
```

Figure 1. Navigate to the Project Folder

Screenshot 2 — Starting Point

git status — working tree clean before editing

```
PS C:\Users\3johnbrother's PC\python-course\expense-tracker> git status
On branch main
Your branch is up to date with 'origin/main'.

nothing to commit, working tree clean
PS C:\Users\3johnbrother's PC\python-course\expense-tracker>
```

Figure 2. Starting Point

Screenshot 3 — Source Code (Part 1 of 2)

VS Code Explorer and the first half of tracker.py

```

1 # Expense Tracker - Installment 3
2 # Author: John Vincent Y. Besinga
3 # Asks for expenses, tax rate and budget, then prints a summary.
4
5 print("-" * 50)
6 print("\t\tEXPENSE TRACKER")
7 print("\t\t Know where your money goes.")
8 print("-" * 50)
9 print()
10 print("MAIN MENU")
11 print("\t[1] Add an expense\t(coming soon)")
12 print("\t[2] View all expenses\t(coming soon)")
13 print("\t[3] Show total spent\t(coming soon)")
14 print("\t[4] Exit\t\t(coming soon)")
15 print()
16
17 name = input("What's your name? ")
18 print(f"Welcome, {name}! Let's log two expenses.")
19
20 subtotal = 0
21 item1 = input("First expense? ")
22 amount1 = float(input("Amount? "))
23 subtotal += amount1
24 item2 = input("Second expense? ")
25 amount2 = float(input("Amount? "))

```

The terminal output shows the program's execution: a welcome message, prompts for two expenses (Coffee for \$4.50 and Lunch for \$8.00), and a tax rate of 12%.

Figure 3. Source Code (Part 1 of 2)

Screenshot 3 — Source Code (Part 2 of 2)

VS Code Explorer and the second half of tracker.py

```

25 amount2 = float(input("Amount? "))
26 subtotal += amount2
27
28 tax_percent = float(input("Tax rate %? "))
29 budget = float(input("Your budget? "))
30
31 average = subtotal / 2
32 tax = subtotal * tax_percent / 100
33 total = subtotal + tax
34 over_budget = total > budget
35 left = budget - total
36
37 print()
38 print("-" * 50)
39 print("SUMMARY")
40 print(f" - {item1}: \t${amount1}")
41 print(f" - {item2}: \t${amount2}")
42 print(f"Subtotal: \t${subtotal}")
43 print(f"Average: \t${average}")
44 print(f"Tax (({tax_percent}%): \t${tax}")
45 print(f"Grand total: \t${total}")
46 print(f"Over budget? \t(over_budget)")
47 print(f"Left in budget: \t${left}")
48 print("-" * 50)
49 print("Made by: John Vincent Y. Besinga | Installment 3")

```

The terminal output continues with the program's calculations and summary: it calculates the average (\$6.25), total (\$12.50), and tax (\$1.50), resulting in a grand total of \$14.00. It also checks if the total is over the budget (\$10) and calculates the remaining budget (\$-4.00).

Screenshot 4 — Program Output

python tracker.py with inputs Sam, Coffee 4.50, Lunch 8.00, tax 12, budget 10

```
PS C:\Users\3johnbrother's PC\python-course\expense-tracker> python tracker.py
=====
                EXPENSE TRACKER
            Know where your money goes.
=====

MAIN MENU
    [1] Add an expense      (coming soon)
    [2] View all expenses  (coming soon)
    [3] Show total spent   (coming soon)
    [4] Exit               (coming soon)

What's your name? Sam
Welcome, Sam! Let's log two expenses.
First expense? Coffee
Amount? 4.50
Second expense? Lunch
Amount? 8.00
Tax rate %? 12
Your budget? 10

-----
SUMMARY
- Coffee:      $4.5
- Lunch:       $8.0
Subtotal:      $12.5
Average:       $6.25
Tax (12.0%):   $1.5
Grand total:   $14.0
Over budget?   True
Left in budget: $-4.0
